

METALHEAD™ FOOD GRADE SENSORS

The best choice for food and packaging machinery where a reliable sealed sensor is required.

METALHEAD™ FOOD GRADE SENSORS

Inductive Proximity Sensors are used in a wide variety of manufacturing operations where a metal target needs to be sensed. Many applications can be solved with a reliable, low-cost sensor, and HTM Sensors inductive proximity sensors have a Lifetime Warranty.

ECS1-1808P-ARU4-100C-316

\$83⁰⁰

FEATURES

- 1-Piece stainless steel sensors for food and packaging applications
- Made of 1-piece of SUS 316 food grade stainless steel bar
- Double the range from standard, the M12 has a 4 mm range
- 100 °C rating for hot food production or cleaning
- Available in PNP, NPN, DC 2-wire and AC output functions
- Ideal for use where pressure washdown and detergents are used
